You focus on the design, and we focus on making it come to life.

A RANGE OF POSSIBILITIES

With our Certified Partner Program - which includes the Fixture Alliance, Keypad Alliance, and a range of other industry partners - you have the freedom to choose the aesthetics that best complement your design, all while ensuring seamless functionality through Vantage.

EXPLORE ALL
CERTIFIED PARTNERS

Whether you are looking for a clean, sophisticated look through flush-mounted controls, or controls and fixtures that are tailored to your design, Vantage is a designer's dream solution. To take the guesswork out of lighting control, every fixture in our Fixture Alliance is pre-calibrated to produce accurate and consistent light color and quality for a high-end lighting experience. Our Keypad Alliance partner's controls are seamlessly incorporated into Vantage projects - so your design not only looks stunning but performs flawlessly.

WATCH:
FIT & FINISH

“ We have been using Vantage as one of our primary replacement systems for nearly 10 years. They have a quality product, that has multiple options and paired with outstanding support. Our Vantage team is the best and we can always count on them to deliver! ”

Paul Biava, President, ETC

GORGEOUS WALL & ACCESSORY FINISHES

Our aesthetically pleasing wall controls come in a range of designs and finishes including options that perfectly coordinate with electrical outlets and audio video connections from Legrand. Mix and match designs and button styles to ensure your system fits your personal style.

ONE SCALABLE SYSTEM

Legrand offers a single, scalable solution, unlike other products on the market. So it doesn't matter what size project you're working on, you only need to learn our one product. Other systems are quickly outgrown, requiring a switch to a completely different product. With Vantage Controls, start small and scale the system as desired.

PERFORMANCE

INTEGRATED, MOTORIZED SHADING

You can't design lighting without managing daylight which is why Vantage offers solutions for easily integrating with a variety of shade manufacturers. You have the freedom to choose the shades that match your project's aesthetic, with the ability to assign scenes and set schedules through our app.

INTUITIVE APP

Our user-friendly app allows you to control lighting, dimming, CCT and RGB, set room scenes and timers, and control shades. When combined with our LHUMAN system, complete human centric lighting control is possible.

“ Making adjustments to programmed scenes can be a tedious process. With Vantage, programming adjustments are smooth and seamless, making changes a breeze. ”

Joel Visser, Co-Founder & Director of Engineering at Number Eight Lighting

HYBRID (WIRED + WIRELESS) SOLUTION

Designed to function together, you can effortlessly combine wired and wireless lighting controls, allowing you to mix and match on projects. Every one of our dimmers is also a keypad—so no need to figure out which one goes where. And as designs inevitably change, rest assured that you have the most flexible system on the market.

NO SWEAT WIRING

Our unique 2-wire bus makes installation easy, delivering a dependable, high-quality solution. And unlike other products on the market, Vantage station bus is non-polarized and can be run as daisy-chain or branched pattern, giving the installer greater flexibility, significantly reducing errors.

GREATER POWER DENSITY

Our panel-based lighting solutions allow for 50% more loads in the same size enclosure than competitors. This equates to a smaller footprint in the mechanical room for the same size system, saving space and money.

INSTALLER-FRIENDLY MODULES

Our patented module design snaps into our panels, so you can install without the use of tools! This allows an electrician to complete all the wiring and verify the loads are operational before installing our dimming modules, eliminating the opportunity for damaging product due to miswiring.

PARTNER
WITH US

“ The level of specification assistance and collaboration Vantage has provided our design team is unparalleled. ”

Marissa Tucci, Tucci Lighting

INDUSTRY EXPERIENCE

With over 35 years of experience, Vantage strives to provide high-quality lighting control solutions for the luxury residential market. We can refer over 1,000 certified installation partners around the world. When you choose Vantage Controls from Legrand, you're choosing a true partner dedicated to your success.

SERVICE & SUPPORT

We offer complimentary design services and are ready to shepherd your project from start to finish.

Our mission is to be the easiest company to do business with for each and every one of our customers. We believe in providing the best service possible, and that our service is not based on how large our customers happen to be.
