

BTICINO > Wiring devices > Living Now > Control for shutters

K4027C

Connected shutter control. It controls a shutter locally or remotely. Compatible with all standard shutter motors (with mechanical or electronic limit switch and maximum power 500 VA), controlled by a wired shutter changeover switch (changeover with the same power supply as the motor). Not compatible with radio controlled or pulse controlled shutter motors. It can be associated to one or more wireless controls. Power supply 100-240 Va.c. - 1 module

Technical features

N° of modules	1
Rated power VA	500VA
Rated voltage	100-240V a.c.
Series	Living Now
