

Male Conduit Grip 3/8inch Diameter Insulated

## Features & Benefits

Liquid-Tight grips are woven of stainless steel mesh with zinc plated steel or malleable iron bodies and nuts for corrosion resistance.

Each fitting is supplied with an insulated throat to provide conductor insulation and protect against damage by flexing, heat expansion and contraction.

Mesh Length: 2.625

They are used to connect liquid-tight flexible conduit to electrical enclosures to prevent conduit pullout.

Liquid-Tight grips are recommended in the wiring of motors and any electrical enclosure where liquid-tight conduit is subject to motion or strain.
