

Wattstopper Discontinued - Touchscreen Injector

Part No. LMTI-100-277

Wattstopper's DLM Touchscreen Injector (LMTI-100-xxx) is a power source for up to two DLM system touchscreens (LMEQ41). It provides ultimate flexibility to the area by converting the communication protocol of the space's in-room bus (IRB) and supplies Power over Ethernet using either a 120VAC or 277VAC feed. Without the need for a separate controller or complex programming, the LMTI-100, combined with the LMEQ-41, provides the end-user with an elegant way to control the lighting system in the space. The LMTI-100 is ideal for DLM offices, education, and healthcare spaces where layered, dimmable, and tunable white lighting is desired through LMEQ-41 touchscreen control.

Features & Benefits

Provides PoE power and communication to power one or two touchscreens without the need for a separate controller or complex programming

Options for 120VAC or 277VAC applications

Plenum-rated enclosure

Converts the communication protocol of the IRB to Po

No configuration needed

Hinged mounting plate for quick and easy installation

Specifications

General Info

Product Line	Wattstopper	Color	Powder White
UPC Number	754182941742	Country Of Origin	China

Dimensions

Product Width US	8.75 in	Product Weight US	5.325 oz
Product Volume US	224.14 cu in	Product Depth US	2.97 in
Product Height US	9.625 in		

Additional Information

RoHS Compliant	Yes	DesignLights Consortium Qualified System	Yes
Security	Yes
